

The Tuffer III Loader Scale System

Material Weighing The Easy Way

The Tuffer III Wheel Loader Scale

The SI On-Board Scales wheel loader weighing systems will support you in achieving safety standards and reduce your liability exposure when trucks go on the road.

Preventing over and under-loading reduces truck turnarounds and improves fleet efficiency, while also reducing your risk to overload fines. Optimize your wheel loader machines today and get the most out of every load.

Weighing systems from SI On-Board Scales determine the exact weight of the material quickly and reliably to improve production efficiency and loading cycle times. The system adds up the weight of the material in each bucket and displays a running total loaded onto the truck for easy load management.

Benefits

Correct Load — Load the correct amount of material every time and keep track of what you are hauling

Eliminate Overloading Liability — Eliminate liability by avoiding truck and trailer overloading

Reduce Material Loss — Reduce the material loss to a minimum

Cost Efficiency — Improve cost efficiency by taking advantage of the full capacity of each bucket and every truck

Reduce Fuel Consumption — Increase the volume of shipped material by maximizing each load, thereby taking advantage of savings with the use of your wheel loader

Maximize Safety — Maximize safety by keeping weight within legal limits, which eliminates accidents caused by overloaded trucks

The Tuffer III Loader Scale System

The Display

In a data driven world the Tuffer III delivers. The Tuffer III easy-to-read color touchscreen is packed with amazing features and functions which supports live data entry used in multiple field applications.

Key Features

- 8 Data Lists (1000 / List)
- Cloud Data Solution
- Job Templates
- On-Screen Diagnostics
- Backup Camera (Option)
- Tip-Off & Target
- Truck & Multi Trailer Loading
- Up to 5 Attachments
- Print Tickets
- Remote Diagnostics & Support

Stay Connected Anywhere

A web-based software platform provides a user-friendly monitoring system for all your vehicles. Hauling IQ optimizes the business process in all areas of hauling and provides a clean, comprehensive and intuitive design to track and segment fleet data.

With Tuffer III-cloud-based reporting tools, you stay connected to your fleet and operations from anywhere.
